

Lightning products Grounding

Protective tube

These sheaths are intended for the mechanical protection of flat conductors 30 mm wide at the bottom of downcomers.

They are fixed using 3 stainless steel clamps provided (regardless of the model). They are to be placed between the control joint and the inspection window or the equipotential bar.

Characteristics

Reference :	GAIPROPAR2	GAIPROTINO
Material :	Galvanized steel	Inox 304L
Type of installation :	Lightning current conductor lightning rod/meshed cage	
Assembly :	3 stainless steel clamps to be fixed at 800mm intervals. Positioning the conductor inside the sheath and tightening the assembly at the level of the 3 collars;	
Use :	Protection against mechanical impacts	
Conductors :	Strips of section 27x2 to 33,5x3 mm	
Composition :	1 protective sheath + 3 fixing brackets with 3 nylon dowels and 3 stainless steel screws	
Dimensions :	2m x 65 x 13 mm	
Weight :	1,200 kg	
Standards :	NF EN 62305-3
