

Lightning products Earthing systems

Lightning earthing marker

It ensures the identification of a lightning conductor earth connection and can be used as a means of warning (prevention against the risks of step voltages and contact voltages).

Each down conductor and lightning earthing system should be equipped with this marker, in case of voltage, contact or step risk.

It must be readable from 3 meters away and must be installed at reading height.

Characteristics

Reference :	PLAQDMTEROR2
Type of installation :	Earthing system
Assembly :	Fixing near to down conductor or metallic structure connected to earthing system
Use :	Lightning or electrical earthing system
Material :	Aluminium
Dimensions :	200 mm side equilateral triangle
Weight :	0,110 kg
Index of protection :	NF EN 62305-3 - NFC 17-102

Duval Messien® - A full range of lightning and overvoltage protection.
